

Special Issue

Sustainability Accounting & Reporting, Environmental Performance and Green Investment

Message from the Guest Editors

Currently, the implementation of sustainability accounting and reporting (SAR) is fragmented. Yet, if the world is to tackle the climate and pollution crises, it needs to urgently transition away from fossil fuel and plastic configurations to more sustainable ones. This transformative journey will involve accounting reforms to enrich stakeholder information with regard to the environmental impact of an organisation's activities. This Special Issue disseminates research that influences policy and practice for a green economic transition. We particularly welcome international, cross-disciplinary articles on business sustainability that integrate financial and environmental considerations. Original research articles and reviews are welcome. Research areas:

- International, cross-disciplinary articles on sustainability that integrate financial and environmental considerations;
- Integrated performance management and reporting (triple bottom line, balanced scorecard, etc.);
- Assessment of firm green credentials and environmental reporting;
- Project multi-criteria evaluation;
- Sustainability accounting standards and reforms to accounting standards.

About the Journal

Message from the Editor-in-Chief

It is our pleasure to inaugurate the new open access journal, *Businesses* (ISSN 2673-7116). *Businesses* is an international, peer-reviewed, open access journal (free for readers), which publishes original empirical, theoretical and management practice articles on all areas of business and other disciplines such as economics, psychology, sociology, anthropology and history. The aim is to provide a platform for research and findings of business studies and related topics, including entrepreneurship research, finance and accounting, economy and business, strategic management, business and industrial marketing, business and environment, business history, business law, etc. Some examples from my own research on these kinds of topics are papers on an industry management practices or entrepreneurial behaviour. There are many other topics that are also appropriate for *Businesses*.

Editor-in-Chief

Prof. Dr. Lester Johnson

Department of Management and Marketing, Swinburne University of
Technology, Hawthorn, VIC 3122, Australia

Author Benefits
