### Message from the Collection Editors

Dear Colleagues,

Thyroid cancer is a heterogeneous disease comprising various molecular and histologic subtypes. Its diverse clinical outcomes highlight the need for identifying robust biomarkers of practical relevance. Biomarkers provide useful information in guiding clinical decision making in patients with thyroid cancer. Biomarkers can be biomolecules such as DNA, RNA, protein, peptide, and biomolecule chemical modifications, or characteristics that can be measured through clinical, pathological, or radiological findings. Biomarkers for thyroid cancer patients are used in research and clinical practice for:

- Diagnosing thyroid nodules and thyroid cancer;
- Predicting outcomes of thyroid cancer;
- Including responses to specific therapeutic interventions;
- Targeting specific groups of patients for whom a particular drug may be useful.

This Collection of *Cancers* is aimed at presenting the latest research on the diagnostic, prognostic, and theranostic biomarkers of thyroid cancer, as well as the application of biomarkers in clinical trials.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Cancers* (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
