submissions:

15 May 2025

Message from the Guest Editor

Dear Colleagues,

Endoscopy has provided physicians with unprecedented access to the gastrointestinal tract, with implications for the management of all major oncological diseases in the gastrointestinal tract. With rapid advances in endoscopic technology, endoscopists are assuming an increasingly significant role in endoscopic oncology. The application of endoscopy affects many aspects of cancer management, ranging from the diagnosis of premalignant and malignant conditions to surveillance of premalignant conditions, the staging of cancers, definitive therapy for early-stage neoplasms, and palliation.

This Special Issue is devoted to the current and future role of the endoscopic oncologist, with a focus on the latest endoscopic advances in the diagnosis, management, and treatment of premalignant and malignant gastrointestinal conditions.

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
