Deadline for manuscript submissions:

closed (1 July 2022)

Message from the Guest Editors

Dear Colleagues,

There is an increasing interest in healthcare applications of artificial intelligence (AI). Because of the central role of advanced imaging in oncologic care and diagnosis and the digital format of medical images, there has been tremendous interest in radiomics and AI applications using medical imaging. This is particularly important in oncology where AI-based diagnostic assistant tools have the potential to enhance diagnosis and enable more precise and personalized therapy. This Special Issue will highlight the important potential role of computerized image analysis and AI applications using advanced imaging for precision oncology, including integration of multi-dimensional data combining image-extracted features with other data types for prediction modeling.

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
