Message from the Guest Editor

BC is the most common cancer in women and, despite advances in early disease detection and treatment, remains the second-leading cause of female cancer deaths, posing a major societal, medical, and health-economic burden.

This Special Issue of *Cancers* with a focus on “Using AI and Imaging Biomarkers for Insights into the Tumor Microenvironment of Breast Cancer” invites submission of the recent advances, current possibilities, and emerging techniques in imaging of the TME of breast cancers and enhancements with AI.

Deadline for manuscript submissions:

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
