Message from the Guest Editors

Dear Colleagues,

Biliary tract cancers include cancers arising in the intra hepatic/extra hepatic bile ducts and gall bladder, and are increasing in incidence worldwide. In recent years, characterization of the genetic differences between these cancers have increased our understanding of drivers of biliary carcinogenesis and led to successful trials of targeted agents. Much work remains to be completed to improve outcomes, biomarkers that aid in patient selection, and manage side effects and improve quality of life. This Issue invites original clinical and translational work in this field and will highlight recent findings and upcoming developments that will impact the future of biliary cancer patient care.

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
