Deadline for manuscript
submissions:

closed (23 February 2024)

Message from the Guest Editor

Dear Colleagues,

Clinical trials underpin modern clinical practice for patients with gastroesophageal cancer. Multimodality therapy remains the mainstay of treatment for gastroesophageal cancer, with the evidence for its effectiveness coming largely from recent clinical trials integrating immunotherapy into the therapeutic repertoire. However, clinical trials of gastroesophageal cancer are notoriously challenging, as several pitfalls are associated with the design and delivery of these trials in a complex cohort of patients with a highly heterogeneous tumor. The field is developing even further as we move towards trials with a greater degree of international collaboration that include the introduction of novel endpoints, surgical and radiological quality assurance and the utilization of machine learning algorithms, warranting a Special Issue in this area.

We invite the submission in the following areas:

- Clinical trials concerning the diagnosis or management of gastroesophageal cancer
- Challenges to undertaking trials in gastroesophageal cancer
- Quality assurance of interventions concerning gastroesophageal cancer

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
