Buffalo, NY, USA

Dr. Evan Michael Graboyes

Department of Otolaryngology–
Head and Neck Surgery, Medical
University of South Carolina,
Charleston, SC, USA

Deadline for manuscript
submissions:

closed (5 July 2024)

Message from the Guest Editors

The incorporation of patient-reported outcomes (PRO) and quality of life (QOL) is standard practice in modern cancer clinical trials for any combination of surgery, chemotherapy, and/or radiation therapy. While these metrics were designed to characterize the patient's experience of disease and treatment sequelae, a growing body of evidence suggests that PRO/QOL parameters can have prognostic implications.

Many validated instruments are currently in use. The correlation of these instruments with objective measures (such as imaging, biomarkers, patient functioning, and survival) is necessary to identify the optimal instrument(s) for each population.

In this Special Issue, we invite original manuscripts and review articles on all topics comparing PRO/QOL instruments, with an emphasis on correlations with objective measures such as imaging, biomarkers (immune function, markers of stress, etc.), patient functioning, and survival.

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
