Message from the Guest Editors

The aim of the present Special Issue is to deepen our knowledge in the field of colorectal cancer associated with chronic inflammation. It is known that chronic inflammation is involved in the development of colorectal cancer through different pathways compared to sporadic colorectal cancer. Moreover, inflammation-related colorectal cancer appears to be associated to a younger age at diagnosis and to a worse outcome. The scope of the present Special Issue is, therefore, to increase the knowledge about inflammation-associated cancers, from its precursors to patient outcomes.

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
