Message from the Guest Editors

Dear Colleagues,

Surgical treatment remains a cornerstone in the management of early stages of all gynaecological cancers. The two fields entailed in our topic are closely related and highly dependent on each other. The tailoring of surgical procedures requires an accurate clinical staging, and vice versa, the utilization of modern imaging modalities improves patient outcomes only if followed by a high-quality surgery.

The management of all gynaecological cancers has evolved dramatically within last 10 years thanks to systematic clinical research. Solid evidence has been gathered for new approaches (less or more radical procedures), thanks to multicentric, international and multidisciplinary collaboration.

We encourage you to submit to this Issue all articles bringing new evidence on the diagnostics and management of gynaecological cancers, precisising individual steps in clinical practice algorithms, or challenging traditional recommendations.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
