### Message from the Guest Editors

Dear Colleagues,

The number of patients with oral cancer has been growing in recent years. Generally speaking, diagnosis at a low stage is beneficial for a good prognosis, and recently, a new molecular target drug and immune checkpoint inhibitor were found to prolong survival after recurrence and distant metastasis.

Although treatment results can be improved through chemoradiotherapy and surgery with wide resection and reconstruction, some patients suffer from poor prognosis.

We must always consider the appropriateness of new treatments and conduct basic research based on each patient's cancer prognosis.

In this Special Issue, we welcome original research articles and reviews on the latest advances in clinical and basic research related to oral cancer.

We look forward to receiving your contributions.

Dr. Kenji Yamagata

Dr. Fumihiko Uchida

## Message from the Editor-in-Chief

*Cancers* (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
