Message from the Guest Editors

Dear Colleagues,

Gastric cancer remains a prevalent disease worldwide, with high mortality rates. Recent advances in early detection and improvements in cancer management have led to decreased incidences and increased survival of patients with gastric cancer.

This Special Issue will discuss the recent discovery of the cellular and molecular bases underlying gastric cancer development and progression, recent advances in endoscopic diagnosis and the early detection of precancerous lesions and early gastric cancer, endoscopic therapy of these lesions, surgical management including techniques and considerations in minimally invasive surgery, innovations in neoadjuvant and adjuvant chemotherapy, immunotherapy, and radiation treatment in gastric cancer.

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Oncology*) / CiteScore - Q1 (*Oncology*)
