### Message from the Guest Editor

Dear Colleagues,

Lung cancer is the second most common cancer and the leading cause of cancer death among both men and women, making up almost 25% of all cancer deaths. Although it mainly occurs in older people, aged 70 or more, it may be diagnosed in younger patients, often with very aggressive features.

In this Special Issue, we would like to focus on the role of surgical treatment of lung cancer, ranging from radical approaches to early-stage lung cancer to combined approached to locally advanced tumors as well as palliative approaches for metastatic diseases.

It is our pleasure to lead such a comprehensive issue, and we look forward to receiving your valuable contribution.

Prof. Dr. Francesco Petrella

## Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Oncology*) / CiteScore - Q1 (*Oncology*)
