Lifestyle, Environment and Respiratory Cancer Risk

Guest Editors:

Dr. Faisal Aziz

The Hormel Institute, University
of Minnesota, Austin, MN 55912,
USA

Prof. Dr. Sandro Arguelles

Department of Physiology,
Faculty of Pharmacy & Biology,
University of Seville, Seville,
Spain

Dr. Abhijit Chakraborty

Department of Surgery, Baylor
College of Medicine, Houston, TX,
USA

Deadline for manuscript
submissions:

closed (31 July 2023)

Message from the Guest Editors

Cancers risk appears to evolve over time as a possible result of changes in dietary, environmental and lifestyle factors, including bacterial infection, diet, drug abuse, radiations and stress; however, the etiology of cancer is complex; bacterial variability, host genetics and environmental factors are the strongest risk factors for the development of carcinoma. This relationship suggests that a need exists to investigate the mechanism as to how these factors combined with host factors might contribute to initiate cancer development.

Therefore, through this Special Issue, “Lifestyle, Environment and Respiratory Cancer Risk”, we aim to highlight the relationship between lifestyle and environmental risk factors and cancer.

We encourage contributions that are focused on, but not limited to, the following themes:

- Lifestyle factors (nutrition, tobacco use, physical activity);
- Natural occurring exposures (ultraviolet light, gas, infectious agents);
- Medical treatments (radiation and medicine);
- Workplace and household exposures;
- Pollution;
- Respiratory cancer risk factors.

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Oncology*) / CiteScore - Q1 (*Oncology*)
