Message from the Guest Editors

This special Issue on *Cancers* is focused on photodynamic therapy and it would include original articles on aspects related with treatment of cancer. In particular, research on photochemical mechanisms, new photosensitizers and delivery tools, cellular and tissue targets, cellular response (cell death and survival), vascular damage and immune response by using different cellular and animal models. Translational work describing the value of PDT alone or in combination with other treatment modalities in cancer treatment will also be included.

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits
