Prevention and Screening in Gynaecological Cancers

Guest Editors:

Dr. Raj Naik

Dr. Pierre Martin-Hirsch

Prof. Dr. Evangelos Paraskevaidis

Prof. Dr. Maria Kyrgiou

Deadline for manuscript submissions:

30 September 2024

Message from the Guest Editors

World Health Organization statistics show that Asia has the highest rate of gynaecological cancers, followed by Africa, Europe, Latin America, North America, and the lowest rate is observed in Oceania. The rates of gynaecological cancers are predicted to rise in forthcoming years. Appropriate strategies are desperately needed to control disease outcomes and it is widely accepted that these approaches should predominantly be preventative or screening. Increased knowledge and research in genetic analysis at population and individual level is providing a greater ability to direct preventative and screening diagnostics to specifically target high-risk groups. With so much that was once considered research now becoming standard clinical practice and in keeping with the "bench to clinic" concept and the explosion of personalized medicine, we, the Guest Editors, are delighted to bring to you this Special Themed Edition in the journal "Cancers", focusing, specifically, on prevention and screening of gynaecological cancers.

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
