Message from the Guest Editor

Dear Colleagues,

This Special Issue of *Cancers* aims to bring together timely reviews and original research articles on the impact of Extracellular Vesicles on cancer progression and on cancer patient's diagnosis. Topics may include but are not exclusively limited to studying the: i) impact of EVs in cancer progression and drug resistance; ii) role of EVs in the bi-directional intercellular communication between cancer cells and the tumor microenvironment; iii) cargo of EVs and their release, intercellular transfer and uptake; iv) search for EV-associated biomarkers of cancer diagnosis or prognosis.

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Oncology*) / CiteScore - Q1 (*Oncology*)
