Message from the Guest Editors

Dear Colleagues,

Epigenetic alterations seem to play an important role during the development and progression of several types of cancers. Of current interest are all epigenetic mechanisms, such as shifts in DNA methylation patterns or alterations in microRNA expression, that contribute to the progression of cancer.

Message from the Editor-in-Chief

Cancers is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed by the Science Citation Index Expanded (Web of Science) and BIOSIS Previews, Scopus and other databases. Citations available in PubMed, full-text archived in PubMed Central.

CiteScore (2018 Scopus data): 5.87, which equals rank 26/321 (Q1) in 'Oncology' and rank 24/191 (Q1) in 'Cancer Research'.
