Message from the Guest Editor

Dear Colleagues,

Despite continuous efforts to increase oncological outcome and quality of life in head and neck squamous cell cancer patients, both difficult-to-treat local relapses and severe treatment-related toxicities still occur at considerable frequency and overshadow the progress that has been achieved through technical and conceptual modifications in recent decades. To assess the benefit of modern treatment techniques (such as dysphagia-adapted IMRT (Intensity-modulated Radiotherapy)) and the combination with novel agents (such as immunotherapy), to analyze treatment outcome in frail and elderly patients, and to investigate the quality of life in long-term survivors, this Special Issue invites experts from the field to share their findings and interpretations of their data.

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
