**Prof. Dr. Christian Poüs**

Inserm UMR-S 1193, Université Paris-Saclay Faculté de Pharmacie, 5 rue J.B. Clément, 92296 Châtenay-Malabry, France

Deadline for manuscript submissions:

**31 October 2024**

### Message from the Guest Editors

Many cancer-related cellular processes, such as cell division and migration, depend on microtubules and their numerous microtubule-associated proteins (MAPs). Both motor MAPs, such as kinesin and dynein, and structural MAPs, such as tau, stathmin, and EB1, have been linked to cancers. Indeed, MAPs have been shown to be overexpressed in tumors and to modulate anticancer drug activity. They have also been proposed as biomarkers or as potential targets in cancer therapies.

This Special Issue will focus on MAPs in cancers, covering both fundamental and clinical aspects of their implication in tumor progression, thus advancing our understanding of mechanisms leading to cancer and paving the way to novel improved cancer therapies.

## Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
