Message from the Collection Editors

Dear Colleagues,

Dynamic regulation in the activity of molecular signaling pathways and networks is critical in cancer. Cancer signaling in various types and conditions of cancers triggers, progresses, and promotes cancer development. Molecular signaling pathway networks involved in progression, metastasis, drug resistance, and development in cancer are the main focuses in this collection.

In the meantime, specific Adverse Outcome Pathways (AOPs) in cancer are also in the main scope of this collection. Any authors who have been developing AOPs in cancer are greatly welcome to submit their papers.

Houston, TX 77030, USA

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
