Special Issue

New Insights into Cell Death and Drug Resistance in Cancer

Message from the Guest Editor

Investigating drug resistance in cancer treatment is critical to reducing failure rates in cancer treatment and improving patient outcomes. This Special Issue, titled "Insights into cell death and drug resistance in cancer", explores the complex relationships among anti-cancer mechanisms, such as types of cell death, signal transduction pathways, and the emergence of drug resistance in cancer. Understanding the mechanisms involved in the acquisition of drug resistance in cancer cells is essential to overcoming cancer drug resistance and can also facilitate the development of effective therapeutic strategies. To summarize, elucidating the relationship between cell death and drug resistance could improve the effectiveness of cancer treatments, refine therapeutic approaches, and, ultimately, lead to better outcomes for cancer patients.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok.

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
