

Special Issue

Advances in Medical Imaging for Cancer Detection and Diagnosis

Message from the Guest Editors

In this Special Issue, we are seeking to determine new imaging techniques, as well as applications of Artificial Intelligence (AI) and Machine Learning (ML), for cancer detection and diagnosis. Applications are sought for (but are not limited to) the following areas:

- Photon-counting CT applications and developments;
- Radiomics;
- AI and ML applications;
- Collaborative CAD/AI;
- Computational Pathology;
- Multimodality imaging of cancer, especially in vivo;
- Emerging cancer imaging modalities.

Guest Editors

Dr. Claudia R. Mello-Thoms

Department of Radiology, University of Iowa, Iowa City, IA, USA

Dr. Mark Anastasio

Department of Bioengineering, University of Illinois at Urbana-Champaign, Champaign, IL, USA

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
