

## Special Issue

# Biliary Tract Tumors: Update in Diagnosis and Treatment

### Message from the Guest Editor

Biliary tract tumors comprise a diverse group of epithelial hepatic and perihepatic malignancies that emerge from the biliary tree. They are a heterogeneous group with very different characteristics depending on the anatomically distinct primary site. The anatomic subtypes comprise gallbladder tumor, extrahepatic and intrahepatic tumor, and ampulla of Vater tumor. In recent years, there have been many advances in the diagnosis of tumors using advanced molecular techniques, including NGS and the development of liquid biopsy. In terms of treatment, surgical resection is still the most important treatment for curative intents, and there have been advances in endoscopic resection and local ablative therapy, including radiofrequency ablation. In addition, the application of chemotherapy, radiotherapy, and immuno-oncology drugs has also recently shown promising results. This Special Issue of *Cancers* therefore encompasses new research articles and timely reviews on all aspects of diagnosis and treatment in biliary tract tumors.

## About the Journal

### Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
