Clinical and Surgical Outcomes in the Management of Extremity Soft Tissue Sarcomas

Message from the Guest Editor

Soft tissue sarcomas are rare forms of cancer that commonly impacts the extremities. They represent less than 1% of all malignancies; however, they have a high incidence rate of death due to disease. A mainstay of treatment has been the combined use of radiotherapy and surgery, with chemotherapy being reserved for patients on an individualized basis. Limb salvage remains the surgical treatment of choice for patients with locoregional disease; however, even with negative margin resection, the rates of recurrence and metastatic disease remain high. In this Special Issue, we will present original research and review articles highlighting advancements in the management of patients with soft tissue sarcomas of the extremities, with a focus on the work-up, staging, and surgical outcomes of patients with these rare malignancies.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
