# Photodynamic Therapy for Cancers: An Update

### Message from the Guest Editor

More than 40 years have passed since photodynamic therapy, which uses physical energy induced by photosensitizing drugs and their excitation light, became an effective therapeutic strategy for cancer. It has gained national-level approval for some cancer types and is spreading as a ray of hope for cancer patients. In this Special Issue, we would like to collect reviews on the current status and prospects of photodynamic therapy for a variety of cancer types, from both a basic and clinical perspective, and also hope to be a signpost for the next generation of PDT researchers.

### Guest Editor

Prof. Dr. Jiro Akimoto

Department of Neurosurgery, Tokyo Medical University, Tokyo, Japan

### Deadline for manuscript submissions

31 August 2025

## About the Journal

### Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
