

Special Issue

Surgical Treatment and Postoperative Outcomes of Gynecological Cancers

Message from the Guest Editor

Gynecologic cancers, including ovarian, endometrial and cervical cancers, account for approximately 100,000 new cases and over 30,000 deaths per year in the US. Surgery is a cornerstone in treatment of most gynecologic malignancies. Although exact numbers of surgical procedures for gynecologic cancers is not known, hysterectomy is the second most common surgical procedure performed in the US.

Understanding perioperative management, changes in surgical treatment and impact of postoperative outcomes is key to providing high quality care for these patients. This special issue will explore changes in surgical treatment, preoperative optimization, best practices and quality improvement initiatives for understanding and improving care for patients with gynecologic malignancies.

Guest Editor

Dr. Lauren S. Prescott
Vanderbilt University Medical Center, Nashville, TN, USA

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
