Exercise Interventions for People Living with Cancer: Advances in Knowledge and Implementation

Message from the Guest Editors

It is estimated that over 53 million people are living with cancer globally. This number will continue to rise with the ageing population, though there have been improvements in survival through earlier detection and breakthroughs in medical treatments. High-level evidence supports the effectiveness of physical activity, including exercise for improving a range of patient-reported and objectively measured outcomes across a range of cancers. However, access to these programs remains limited. This Special Issue aims to highlight the impact of physical activity or exercise interventions for cancer survivors from diagnosis onwards. We welcome original research or review articles, including those seeking to understand the effects of newer treatment types, the most effective types of exercise, and models of care to improve access and program sustainability. We also welcome critiques and well-conducted studies with null findings. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
