

Special Issue

Clinical and Surgical Therapy for Colorectal Cancer

Message from the Guest Editor

This Special Issue aims to explore the latest advancements in colorectal cancer surgery, including novel techniques, enhanced recovery pathways, and integrated therapeutic approaches. It will also touch upon the role of microbiome research in supporting surgical outcomes and quality of life. By addressing both clinical and surgical innovations, this Special Issue aligns with the journal's focus on translational and clinical cancer research. In this Special Issue, original research articles and reviews are welcome. Research areas may include, but are not limited to, the following topics:

- Advances in surgical techniques, including minimally invasive and robotic approaches.
- Anterior resection and total mesorectal excision outcomes.
- Innovations in perioperative care and enhanced recovery after surgery (ERAS).
- Role of neoadjuvant therapy (in particular total neoadjuvant therapy).
- Postoperative complications, management, and long-term outcomes.
- The interplay between the gut microbiome and postoperative recovery.
- Quality of life and survivorship in patients following surgery.

We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
