

Special Issue

Novel Approaches to Gynecologic Cancers Biology and Treatment: 2nd Edition

Message from the Guest Editors

In recent years, rapid developments in both basic and clinical research have been observed in the field of gynecologic oncology. We can offer our patients a variety of targeted treatments, from immunotherapy, PARP inhibitors, anti-angiogenic drugs, to microinvasive surgeries. Multiple novel drugs and methods are currently under investigation. However, clinicians have to be aware that any progress in medicine is not possible without the development of basic sciences. The aim of this Special Issue of *Cancers* is to provide a platform for researchers and practitioners to present their high-quality original and review papers covering the results of basic research, as well as clinical investigations dedicated to extending our knowledge of ovarian, endometrial, cervical and vulvar cancer. The scope of this Special Issue includes reports of both surgical and medical interventions aiming to improve the diagnostics and treatment of gynecologic cancer. Articles based on experimental results will provide novel insights into the biology of gynecologic malignancies, and reports of well-designed experiments employing novel drugs will be welcome.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
