

## Special Issue

# Acute Myeloid Leukemia: From Diagnosis to Treatment

### Message from the Guest Editor

In this Special Issue, we focus on the most recent updates regarding AML diagnosis and classification, as well as on newest therapies for AML that are currently available and those under development. We will discuss factors that are considered when tailoring a treatment decision, both in newly diagnosed and relapsed/refractory settings, including the role of allogeneic stem cell transplant and the current state of cellular therapies. In this Special Issue, original research articles and reviews within the scope of the topics described above are welcome. I look forward to receiving your contributions.

## About the Journal

### Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.
