

## Special Issue

# Endocrine Therapy for Breast Cancer

### Message from the Guest Editor

Breast cancer is the most common cancer worldwide. Nowadays, endocrine therapy is a valuable option for the prevention and treatment of estrogen receptor-positive breast cancer due to its demonstrated efficacy and favorable safety profile. This Special Issue will discuss the recent advances in endocrine therapy for breast cancer. I would like to invite you to contribute a related paper. Original articles or reviews are all welcome.

## About the Journal

### Message from the Editor-in-Chief

*Cancers* (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.
