Head and Neck Cancer: Epidemiology, Prevention, Treatment, and Quality of Life

Message from the Guest Editor

Head and neck cancers are etiologically linked to the human papilloma virus (HPV) for oropharyngeal cancer and to health behaviors such as smoking and alcohol for non-HPV squamous cell carcinomas; the latter is known to be patterned with social disparities. Head and neck cancers carry an important burden of disease and treatments, with rehabilitation a mainstay as patients often experience disfigurement and dysfunction (e.g., eating, speech, breathing, mobility, distress). Treatments comprise a combination of surgery, radiation therapy, chemotherapy, and/or targeted therapies, with an attention to preserving function and quality of life. This Special Issue is designed to feature research on the epidemiology, prevention, treatment, and quality of life of head and neck cancers. We invite authors to contribute to this issue, which will allow more visibility to a population that is often under-served and -researched.

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
