

# Special Issue

## Insights from the Editorial Board Member

### Message from the Guest Editor

This Special Issue aims to summarize and highlight the research results, opinions, and literature reviews of the Editorial Board members of *Cancers*. In this Special Issue, these members will share their views on current hot research topics, highlighting research trends and the latest innovations and novel findings in cancer research. This Special Issue aims to present basic, translational, and clinical studies on all tumor types, and topics of interest include, but are not limited to, the following:

- Cancer therapeutics;
- Cancer biomarkers;
- Precision medicine;
- Cancer genomics;
- Cancer immunology;
- Cancer biology;
- Clinical trials;
- Cancer epidemiology and prevention;
- Tumor microenvironment and metastasis;
- Cancer informatics.

---

## About the Journal

### Message from the Editor-in-Chief

*Cancers* (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.
