Research on Early Diagnosis and Treatment of Gastric Cancer

Message from the Guest Editor

Although gastric cancers (GCs) are decreasing worldwide, GC is still the sixth most common cancer and the third leading cause of cancer death; hence, further efforts are required to improve the prognosis of GC patients. In particular, GC is common in East Asia, where measures to reduce the number of GC-related deaths are of high importance. In practice, Japan and South Korea successfully introduced a health-check program for residents in order to detect GC at an early stage and treat it curatively. Early diagnosis and treatment are the most effective measures to reduce GC mortality and it is necessary to further advance this field in the future. This topic calls for the latest research reports on the early diagnosis and treatment of GC.

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
