Early Age Onset Cancers

Message from the Guest Editors

For reasons not yet known, early age onset cancer is on the rise. Aetiology, biomolecular profile, treatment sensitivity, and prognosis are unclear as young patients have historically been underrepresented in clinical trials. They pose unique and important challenges associated with functional status, psychosocial well-being, and quality of life in survivorship. A particular emphasis of research in early-age cancer should be on appropriate multimodal treatment (with avoidance of overtreatment), a consideration of age-specific concerns and long-term treatment-related morbidities, and an identification of genetic mutations which may influence therapeutic decision making. This Special Issue aims to present clinical and translational data relating to early age onset cancer with a specific focus on colorectal and breast cancer. Original research articles and reviews are welcome. We look forward to receiving your contributions.

Guest Editors

Prof. Dr. Des C. Winter

Centre for Colorectal Disease, St. Vincent's University Hospital, Elm Park, Dublin 4, Ireland

Dr. Alexandra M. Zaborowski

Department of Surgery, Royal College of Surgeons, Dublin, Ireland

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
