Special Issue

Immune Deficiency-Associated Lymphoma

Message from the Guest Editor

Lymphomas occurring in patients with immunodeficiency have specific characteristics in terms of their presentation, pathological diagnosis, pathophysiology, and therapeutic management. They occur in very different circumstances: associated with human immunodeficiency virus infection, in organ or hematopoietic stem cell transplant patients, in the context of genetic immunodeficiency syndromes, or associated with immunosuppressive therapies for systemic diseases. Where possible, improving the immune response (reducing immunosuppressants, controlling HIV infection) is an important part of treatment, usually associated with an immunochemotherapy approach. These different aspects will be discussed in this Special Issue.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok.

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
