Advances in Antitumor Molecular-Targeted Agents of Urological Cancers

Message from the Guest Editors

According to tumor malignancy statistics, the occurrence of urological cancers is continuously increasing in Western countries; this is mainly due to the increased life expectancy in these geographic areas, but other factors also contribute to this growth. An understanding of dysregulated pathways and the identification of potential biomarkers for the treatment of urological cancers have facilitated the identification of new targets and pathways for novel-targeted therapies, including immunomodulatory agents and agents that target angiogenesis, growth factor receptors, and epigenetic pathways. The aim of this Special Issue is to present recent advances in antitumor molecular-targeted agents in prostate, kidney, bladder, and testicular cancer, and to present clinical evidence of their use, whether alone or in combination.

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
