

Special Issue

Radiology for Diagnosis and Treatment of Liver Cancer

Message from the Guest Editors

We are expanding the possibilities for the diagnosis and treatment of liver cancer. Radiology is positioned at the center of these advances. In this Special Issue, we explore innovative approaches in the diagnosis and treatment of liver cancer, focusing on state-of-the-art radiology. We are currently seeking abstracts for this Special Issue on the following topics: 1) recent advances in hepatocellular carcinoma imaging techniques, 2) new possibilities for hepatocellular carcinoma treatment with radiation therapy including particle beams, 3) combining artificial intelligence (AI) and diagnostic radiology to improve outcomes for hepatocellular carcinoma patients, 4) new radiological approaches to 4) the optimization of liver cancer treatment by integrating new radiation technologies with existing therapies, and 5) personalized treatment strategies based on advances in imaging technologies and molecular radiation therapy. Your research results, insights, and new perspectives will enhance our knowledge and understanding and open new avenues in the diagnosis and treatment of patients with liver cancer. We sincerely welcome your contributions.

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
