Challenges and New Strategies in the Management of Pediatric Brain Tumors

Message from the Guest Editors

Pediatric brain tumors present a unique set of challenges in terms of diagnosis, treatment and long-term outcome. The broad range of different tumor types is complex and heterogenous with regard to genetic mutations and biological behavior, making it difficult to identify optimal treatment strategies that are both safe and effective across all subtypes. Advances in personalized medicine, such as targeted therapy, immunotherapy or high-precision ion beam therapy, have increased the therapeutic window in these patients. This Special Issue aims to highlight the recent advances in the interdisciplinary management of pediatric brain tumor patients to further improve the outcomes of pediatric brain tumor patients, whilst minimizing the risk for long-term side effects. We welcome Reviews and Original Articles on any aspect related to this topic.

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
