

## Special Issue

# Clinical and Pathologic Response to Therapy in Gastrointestinal Oncology

### Message from the Guest Editors

With a growing focus on multimodality therapy for a variety of gastrointestinal cancers, there has been a movement to emphasize therapies in the neoadjuvant setting. One major potential advantage of this approach is the ability to study treatment effects of therapies for tumors in their original location. However, with an ever-expanding array of novel treatments, including, but not limited to, immune and targeted therapies, the study of treatment response becomes increasingly complex. Research efforts are needed to improve our understanding of tumor response biology and the subsequent prognostic and therapeutic implications. This Special Issue focuses on recent efforts (original research and reviews) to study tumor responses to oncologic therapy across gastrointestinal oncology.

## About the Journal

### Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
