

## Special Issue

# Molecular Pathology and Human Cancers

### Message from the Guest Editors

In the modern era of personalized medicine, molecular cancer signatures have played a pivotal role along with traditional pathology in guiding cancer diagnosis and patient-tailored therapies. Herein, we propose a Special Issue dedicated to "Molecular Pathology and Human Cancers", aiming to explore the latest advancements and research in this critical field. This issue will cover a wide range of topics, including the molecular mechanisms underlying cancer development, novel diagnostic biomarkers, and innovative therapeutic strategies. By bringing together cutting-edge research and expert reviews, we aim to provide a comprehensive overview of how molecular pathology is transforming our understanding and treatment of human cancers. This Special Issue will serve as a valuable resource for researchers, clinicians, and healthcare professionals dedicated to improving cancer diagnosis, prognosis, and therapy.

## About the Journal

### Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
