Advanced Insights into the Etiology of Lymphoma

Message from the Guest Editors

Lymphoma arises from a complex interplay of genetic, viral, immune, and environmental factors. While certain etiological contributors—such as inherited genetic predispositions, viral infections, and immunodeficiency—are well established, new research is continuing to reveal additional drivers of lymphomagenesis. This Special Issue will highlight both known and emerging factors in lymphoma etiology, providing a comprehensive view of the mechanisms underlying disease initiation and progression across different lymphoma subtypes. We invite submissions investigating the etiological factors contributing to the risk of lymphoma overall or lymphoma subtypes. Studies must focus on human populations and be research articles, not review papers. Topics of interest include research on genetic predisposition, clonal hematopoiesis, clonal evolution, viral and microbial influences, immune dysregulation, environmental exposures, and novel biomarkers. Epidemiological studies, biomarker-based risk assessment, and multi-omics analyses are particularly encouraged. Submissions based on animal models or cell line studies will not be considered.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
