Special Issue

Cervical Cancer: Risk Factors, Screening, and Prevention Strategies

Message from the Guest Editor

Cervical cancer is a significant global health concern, primarily affecting women. It arises from abnormal cell growth in the cervix, the lower part of the uterus. While it remains a prevalent malignancy, advancements in risk assessment, screening methods, and preventive strategies have significantly contributed to its prevention and early detection. We welcome original articles and comprehensive reviews focusing on high-quality basic and clinical research on cervical cancer. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok.

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.
