Special Issue

Clinical Surgery for Hepato-Pancreato-Biliary (HPB) Cancer

Message from the Guest Editors

Hepato-biliary and pancreatic (HPB) malignancies still represent one of the most complex challenges for surgeons, both from a technical and oncological point of view. HPB malignancies range from liver ones to pancreas, bile duct and Vater papilla ones. Each of these malignancies require a complex multidisciplinary approach, involving gastroenterologists, endoscopists, oncologists, radiologists, pathologists and surgeons. From a surgical point of view, the treatment of these malignancies often requires a large complex procedure, exposing the patients to a high risk in terms of morbidity and mortality. However, despite their complexity, currently, many procedures can be performed via a minimally invasive approach. Despite many efforts over the last few decades, the majority of these malignancies continue to have a bad prognosis. The aim of this Special Issue is to collect different experiences regarding the multidisciplinary management of the most frequent and important HPB diseases.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok.

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
