

# Special Issue

## Pathology of Pediatric Cancers

### Message from the Guest Editors

We extend a warm and heartfelt invitation to you to contribute to our upcoming Special Issue on "Pathology of Pediatric Cancers." This significant endeavor aims to gather and showcase the latest research and insights into the intricate landscape of cancers afflicting children. In this Special Issue, we aspire to delve deep into the realms of pediatric oncology, exploring the diverse aspects of cancer pathology specific to this vulnerable population. We encourage you to share your original research, reviews, and case studies, which will enrich our understanding of the molecular, histopathological, and immunological intricacies underlying these malignancies. Contributions to this Special Issue will contribute to shaping the future of pediatric oncology, guiding clinical decision making, and fostering collaborative efforts towards a shared goal of eradicating the burden of cancer in children. Please join us in this critical endeavor by submitting your research, thus making this Special Issue a resounding success in advancing the field of pediatric cancer pathology. Thank you for considering our invitation. We eagerly await your valuable contributions.

### Guest Editors

Dr. Angela Mastronuzzi

Department of Hematology/Oncology, Cell and Gene Therapy, Bambino Gesù Children's Hospital, IRCCS, 00165 Rome, Italy

Dr. Maria Antonietta De Ioris

Department of Paediatric Haematology/Oncology, Cell and Gene Therapy, Bambino Gesù Children's Hospital, IRCCS, Rome, Italy

### Deadline for manuscript submissions

closed (30 October 2024)

## About the Journal

### Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.
