Liquid Biopsies in Gynecologic Cancer

Message from the Guest Editors

Gynecologic cancers represent a significant cause of morbidity and mortality for women worldwide. Their management is often complicated by nonspecific early symptoms, leading to diagnosis at an advanced stage. Traditional approaches to diagnosis and disease monitoring rely on invasive tissue biopsies and imaging techniques, which have inherent limitations for real-time assessment of tumor evolution and treatment response. Recently, there has been significant progress in the field of liquid biopsies. This minimally invasive approach has the potential to revolutionize the clinical management of these tumors.

This Special Issue aims to expand our knowledge on the recent advances in the diagnosis, treatment, and prognosis of gynecologic cancers using liquid biopsy. Original research articles, reviews, case series, letters and commentary are welcome.

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
