

Special Issue

Cancer Survivorship: During and After Treatment

Message from the Guest Editor

This Special Issue explores the challenges and experiences faced by individuals during and after cancer treatment. It delves into topics such as survivorship care planning, rehabilitation, return to work, managing treatment side effects, psychological support and lifestyle interventions to improve the quality of life post-treatment. The issue aims to provide insights into the unique needs of cancer survivors and highlight strategies for promoting long-term health and well-being beyond the treatment phase. Through a multidisciplinary approach, it offers valuable perspectives for healthcare professionals, researchers and survivors themselves navigating the journey of cancer survivorship.

About the Journal

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits
