Cutaneous Lymphomas: Present and Future

Message from the Guest Editor

Cutaneous lymphomas (CLs) are rare entities that can often be misdiagnosed as more common reactive or inflammatory conditions. Increasing awareness of CL is essential to avoid diagnostic delays and inappropriate therapies and to ensure optimal patient management. The aim of this Special Issue of *Cancers* is to provide an updated overview of CL, covering key aspects such as epidemiology, early recognition, clinical presentation, and therapeutic strategies. In addition to consolidating current knowledge, this Special Issue seeks to highlight novel therapeutic approaches and possible molecular targets that may shape the future of CL management

Guest Editor

Dr. Alessandro Pileri

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
