Cancer Stem Cells: The Origin of Tumor Relapse and Metastasis

Message from the Guest Editors

We are pleased to invite esteemed cancer researchers and physicians to contribute their expertise and insights to our upcoming collection of manuscripts, titled "Cancer Stem Cells: The Origin of Tumor Relapse and Metastasis". The themes of this Special Issue are of paramount importance, as cancer stem cells not only drive tumor initiation and therapy resistance but also play a fundamental role in metastatic dissemination. Their unique ability to self-renew and adapt to microenvironmental cues fuels tumor heterogeneity and enables the invasion of distant organs. Furthermore, the tumor microenvironment—comprising stromal support, immune modulation, and extracellular matrix remodeling—creates a permissive niche that fosters metastatic outgrowth. We invite submissions in the form of both original research and comprehensive review articles covering a wide range of topics, including (but not limited to) tumor biology, metastasis, cancer stem cell signaling, tumor heterogeneity, plasticity, immune evasion, and therapeutic resistance.

Guest Editors

Dr. Ming Tan

Research Center for Cancer Biology, Graduate Institute of Biomedical Sciences, Institute of Biochemistry and Molecular Biology, China Medical University, Taichung 406040, Taiwan

Dr. Evgeniy V. Denisov

Cancer Research Institute, Tomsk National Research Medical Center, 634009 Tomsk, Russia

Deadline for manuscript submissions

31 August 2026

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
